- Mongo DB
- GitHub/GitLab
- GraphQL API
- REST API

Education

Sarvajanik College of Engineering and Technology (SCET)   *2020 - 2024*

B.E. in computer engineering

Work Experience

Ellifi :   *JAN 2024 - OCT 2025*

Worked as a **Frontend Developer** at Ellifi, contributing to both the company's core product and multiple client projects. During this time, I strengthened my expertise in React, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, API integration, and optimizing UI performance. I also collaborated closely with design and backend teams, improved code quality, and delivered user-focused, responsive interfaces.

1. **Hisurat.com :**
   - Built high-performance and user-friendly pages for a city exploration platform featuring deals, places, businesses, and events. Improved overall UI/UX and responsiveness.
   - **Technology used** : Next Js, Typescript, Tailwind CSS, GrapQL.

2. **Give.do :**
   - Developed responsive UI components for a donation platform, enhanced performance, and ensured smooth REST API integrations for seamless user flows.
   - **Technology used** : React Js, Next Js, Typescript, MUI, JQuery, Rest API.

3. **Onstar.com :**
   - Implemented complex logic-driven features for an in-vehicle technology platform. Built scalable UI components and integrated Shopify modules while optimizing navigation and performance.
   - **Technology used** : Remix Js, Tailwind CSS, Typescript, Shopify, GrapQL.

Projects

1. <u>Portfolio Website</u>:
- Developed a personal portfolio website to professionally showcase my projects, skills, and work experience with a clean, modern, and responsive UI. Integrated a contact form for easy communication, added dark/light theme toggle for better user experience, and included analytics to track visitor insights.
- **Technology Used**: Next.js, TypeScript, Tailwind CSS, Formspree, Vercel

2. <u>Movie Screening Website</u>:
- Built an interactive movie platform where users can sign up, browse and search movies, view detailed information, and maintain a personalized wishlist of favorites. Designed an engaging, user-friendly interface with smooth navigation and responsive layouts for a seamless experience.
- **Technology Used**: React.js, Redux Toolkit, JavaScript, CSS.

3. <u>Myntra Clone</u>:
- Developed a Myntra clone web application replicating core e-commerce functionalities where users can browse products, add items to cart or wishlist, and explore categories through an intuitive, responsive UI. Built with static product data to demonstrate shopping flow without checkout or user authentication features.
- **Technology Used**: React.js, Node.js, Express.js, JavaScript, CSS
